Healthy marine species like whales, sea turtles, coral, and salmon are important for maintaining balanced and thriving ocean ecosystems. We work to prevent marine species populations from decline and extinction, protect them from human activities, and monitor activities that might impact them so they are around for future generations.

The orca is the world's largest predator of warm-blooded animals, and the only cetacean to routinely hunt marine mammals, including seals, sea lions, dolphins and sea otters. The orca will even kill large whales, and also hunts fish (including sharks and rays), squid, octopuses, sea turtles and seabirds, such as penguins. Despite this ...
